

Energy Management Policy

At Mankind Pharma, efficient energy management is central to sustainable operations, environmental responsibility and long-term business success. Our approach focuses on strengthening energy performance while supporting the broader mission of delivering quality healthcare with minimal environmental impact.

Our Commitments :

1. Continual improvement in energy performance, including energy efficiency, energy use and energy consumption, through systematic monitoring, measurement and analysis.
2. Establishment, implementation and maintenance of an effective Energy Management System (EnMS) to drive structured energy management practices.
3. Development and periodic review of Energy Baselines (EnBs) and Energy Performance Indicators (EnPIs) to track performance and identify opportunities for improvement.
4. Compliance with all applicable legal, regulatory and other requirements related to energy use, consumption and efficiency.
5. Definition and regular review of measurable energy objectives and targets at relevant levels and functions within the organisation.
6. Ensuring the availability of necessary information, resources, infrastructure and competent personnel to achieve energy objectives and targets.
7. Integration of energy performance considerations into the design, modification and renovation of facilities, equipment, systems and processes.
8. Adoption of energy-efficient procurement practices, giving preference to products and services that have a significant impact on energy performance.
9. Promotion of awareness, training and active participation of employees and relevant stakeholders in energy conservation and efficiency initiatives.
10. Communication of this policy across the organisation and making it available to all relevant stakeholders.
11. Periodic review of the policy to ensure its continued suitability, adequacy and effectiveness.
12. Applicability of the policy to all operations and facilities of Mankind Pharma and its subsidiaries, joint ventures reinforcing collective responsibility towards efficient energy use.
